

PROFESSIONAL SUMMARY

Software Developer with nearly **3 years** of experience building **scalable Android applications and SDKs** using **Kotlin, Jetpack Compose, MVVM/MVI & Compose Multi-platform CMP**. Experienced in architecting high-performance solutions, optimizing application reliability, and delivering user-centric products across the **Gaming, Healthcare, and FinTech** domains, including platforms serving **10M+ users**.

EXPERIENCE

- Associate Android Developer – Gaming

N. A. Sportz Interactive Pvt. Ltd. – Full-time

Apr 2026 – Present

Mumbai, Maharashtra, India

 - Built a high-scale Android gaming SDK using **Jetpack Compose, MVI Clean Architecture** for **10M+ UEFA users** worldwide.
 - Developed **leaderboards, achievements, analytics, and localization** to enhance fan engagement across global tournaments.
 - Resolved critical production issues and optimized performance, improving stability and user experience for **10M+ users**.
 - Collaborated with product, backend, design, and QA to build reusable SDK components, accelerating releases and maintainability.
- Android Developer

General Diagnostic International Pvt. Ltd. – Full-time

Nov 2023 – Apr 2026

Navi Mumbai, Maharashtra, India

 - Built scalable healthcare applications using **Kotlin, Jetpack Compose, MVVM, and MVI**, delivering reliable user experiences.
 - Integrated **CameraX, Google ML Kit, and Google Maps** for image analysis, motion detection, and real-time location services.
 - Implemented **GitHub Actions CI/CD** pipelines, reducing deployment time by **40%** and enabling automated, flexible releases.
 - Developed and optimized **.NET Core** REST APIs, reducing response time by **15%** and improving overall backend performance.
- Android Engineer Intern

Spare8 Platforms Pvt. Ltd. – Internship

Apr 2023 – Nov 2023

Mumbai, Maharashtra, India

 - Migrated a legacy Android application to **MVVM Clean Architecture**, improving modularity, scalability, and maintainability.
 - Implemented **Dagger-Hilt** dependency injection to enhance code scalability, testability, and maintainability.
 - Optimized application performance by **30%** through code refactoring and REST API enhancements.
 - Collaborated in **Git-based CI/CD** workflows with senior engineers to deliver reliable releases and streamline development.

SKILLS

Languages	: Java, Kotlin, JavaScript (ES6), SQL, HTML5, CSS3, C.
Frameworks / Libraries	: Compose Multi-platform CMP, Spring Boot, Ktor, Node.js, Jetpack Compose, React.js, Next.js, Tailwind CSS.
Architecture & Design	: Clean Architecture, Microservices Architecture, MVI, MVVM, MVP, MVC.
Databases	: PostgreSQL, MySQL, MongoDB, Firebase, Room DB, Realm DB, ObjectBox (NoSQL).
Tools	: Linux, Git, Docker (basic), AWS (S3, DynamoDB - basic), CI/CD fundamentals.

EDUCATION

Birla Institute of Technology & Science, BITS Pilani MTech Artificial Intelligence & Machine Learning	Pilani, Rajasthan, India
Vasantdada Patil Pratishthan’s College of Engineering & Visual Arts B.E. Information Technology	Mumbai, Maharashtra, India 8.12 CGPA

PROJECTS

- UEFA Gaming Hub

Technology Used: Kotlin, Jetpack Compose, MVI Clean Architecture, Dagger-Hilt, J-Unit

Playstore Link

 - Developed and maintained UEFA sports gaming SDKs powering digital experiences for 10M+ users, including UEFA Fantasy and interactive gaming experiences.
 - Worked on Fantasy, Trivia and More or Less (MoL) gaming experiences for UCL and UWCL, implementing gameplay flows, scorecards, leaderboards, rankings, achievements, and API-driven game configurations.
 - Implemented analytics tracking, localization, RTL support, dynamic UI configurations, production bug fixes, and SDK version upgrades across Android and cross-platform components.
 - Worked with Kotlin Multiplatform (KMP) and Compose Multiplatform (CMP), REST APIs, Git, and Bitrise for development, testing, and production releases.
- Material X

Technology Used: Kotlin, Android, Jetpack Compose, Material Components, Custom Views, Motion Sensors

Live Link

 - Designed and developed Material X, a customizable Android UI component library featuring dialog boxes and pickers.
 - Motion Sync feature enables user-added components to move in sync with phone tilt, enhancing user interaction and customization.
- GD Care

Technology Used: Kotlin, Jetpack Compose, MVVM, MVI, Clean Architecture, Dagger-Hilt, .NET MVC

PlayStore Link

 - Developed and maintained GD Care, implementing Android features using Jetpack Compose, MVVM/MVI Clean Architecture, and Dagger-Hilt for dependency injection.
 - Integrated Google ML Kit for facial motion and liveness detection, CameraX for real-time image capture, and Google Maps SDK for capturing users’ real-time location.
 - Developed REST APIs using the .NET MVC framework to support application functionality and backend services.
